mos | Horizon®

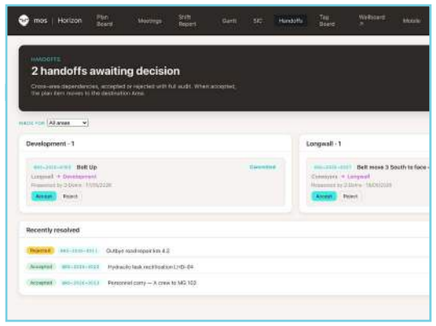
At Mapped Out Solutions, we understand that operational success depends on teams being aligned, informed and working from the same plan. That is why we developed Horizon® as a software solution designed to help operations connect planning, execution and operational visibility in one practical environment.

What mos | Horizon® offers

Horizon® is built to help teams improve coordination, strengthen visibility and support better operational decision-making by connecting planning activities with everyday execution.

Here's how it supports your operation:

- **Connected planning visibility**
  Bring together weekly, daily and shift planning into one practical environment to help teams stay aligned.
- **Better plan vs actual awareness**
  Monitor progress against operational priorities with clearer visibility of activity and outcomes.
- **Improved team coordination**
  Support stronger communication between crews, supervisors and operational areas through shared visibility.
- **Real-time operational awareness**
  Maintain visibility of changing priorities and operational activity throughout the shift.
- **Plan board visibility**
  Visualise operational activities across weekly, daily and shift planning horizons in one connected view.
- **Short interval control (SIC)**
  Track progress and operational issues throughout the shift to help teams respond more effectively.
- **Diesel tag board visibility**
  Monitor equipment movement and activity to support safer and more coordinated operations.
- **Gantt planning view**
  Understand schedules, dependencies and operational priorities through a practical visual timeline.
- **Shift handover visibility**
  Improve continuity between teams with clearer communication of priorities, updates and responsibilities.
- **Connected operational planning**
  Support stronger alignment between planning and execution through one shared operational environment.



Cross-area handoffs are requested, accepted and audited in Horizon

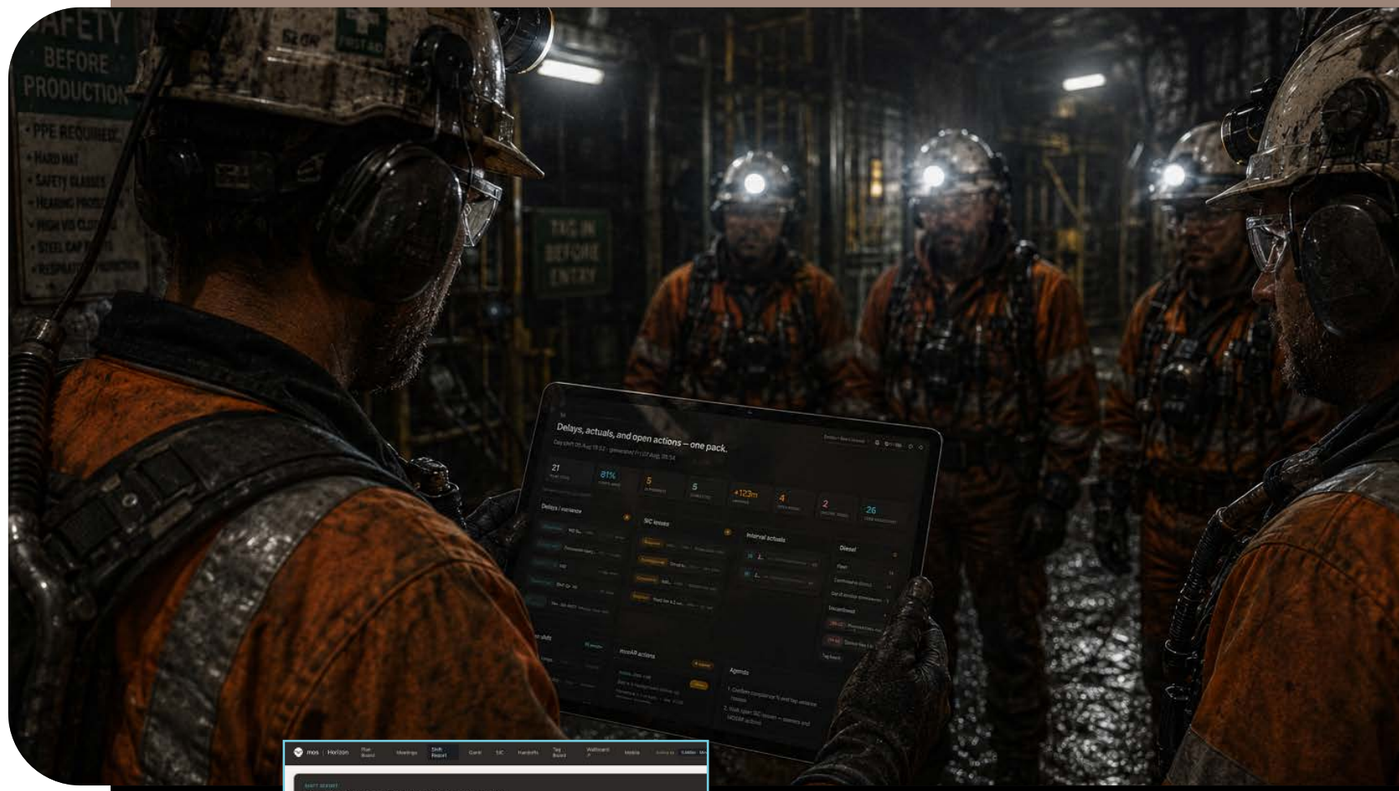
This software is about helping operations stay connected, coordinated and focused on execution, not just creating another planning tool.

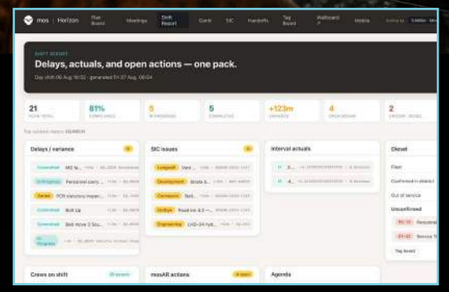
mapped out solutions

Why choose Horizon®?

Horizon® has been developed to help operations improve planning visibility, strengthen coordination and support more confident execution.

- **Built for operational environments**
  Designed specifically for the realities of site operations where priorities can shift quickly and visibility matters.
- **Better visibility across the shift**
  Give teams clearer insight into operational priorities, progress and changing site conditions.
- **Improve team coordination**
  Support stronger communication and alignment between supervisors, crews and operational teams.
- **Easy to use**
  The platform is designed to present operational information in a practical, easy-to-understand format.
- **Support when you need it**
  Mapped Out Solutions provides training and ongoing support to help your team confidently adopt and use the platform.





Delays, actuals, SIC issues and diesel sit in one shift pack

Planning made simple

Horizon® brings weekly, daily and shift planning into one connected view, helping teams stay aligned, track progress and respond to changing priorities. With clearer visibility from planning through to handover, every shift can work with greater coordination, control and confidence.
