mos | MOC®

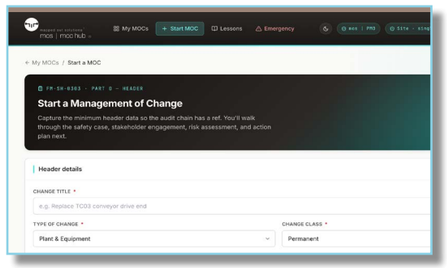
At Mapped Out Solutions, we understand that change in high-risk operational environments needs to be managed carefully, consistently and with clear accountability. That is why we developed MOC® as a software solution designed to help organisations manage change in a more structured, connected and practical way.

What MOC® offers

MOC® is built to help operations improve visibility, strengthen accountability and manage change through one connected workflow, from proposal through to implementation and review.

Here's how it supports your operation:

- **End-to-end change visibility**
  Manage every stage of change through one connected process to improve visibility, ownership and operational confidence.
- **Stronger governance & accountability**
  Support a more consistent approach to approvals, risk management and stakeholder involvement.
- **Safer, more informed decision-making**
  Help ensure operational changes are reviewed with the right level of visibility and supporting information.
- **Connected operational workflows**
  Keep actions, approvals and operational activity connected to improve consistency and reduce duplication.



Every change starts here: title, type, class and the workflow that follows

Key features for everyday use

- **Guided change workflow**
  Follow a structured process that supports every stage of management of change, from proposal through to implementation and closure.
- **Emergency change management**
  Support urgent operational requirements with practical workflows that maintain visibility and accountability.
- **Smart approval routing**
  Help ensure the right people are involved at the right stage of the process to improve efficiency and oversight.
- **Action tracking & accountability**
  Monitor actions generated through change processes to support stronger follow-through and operational visibility.
- **Inspector-ready documentation**
  Maintain clear records of decisions, approvals and supporting information to strengthen reporting and compliance confidence.
- **Connected project visibility**
  Bring every stage of management of change into one tracked workflow, giving teams clear visibility from the initial case for change through risk, approval, review and closure.

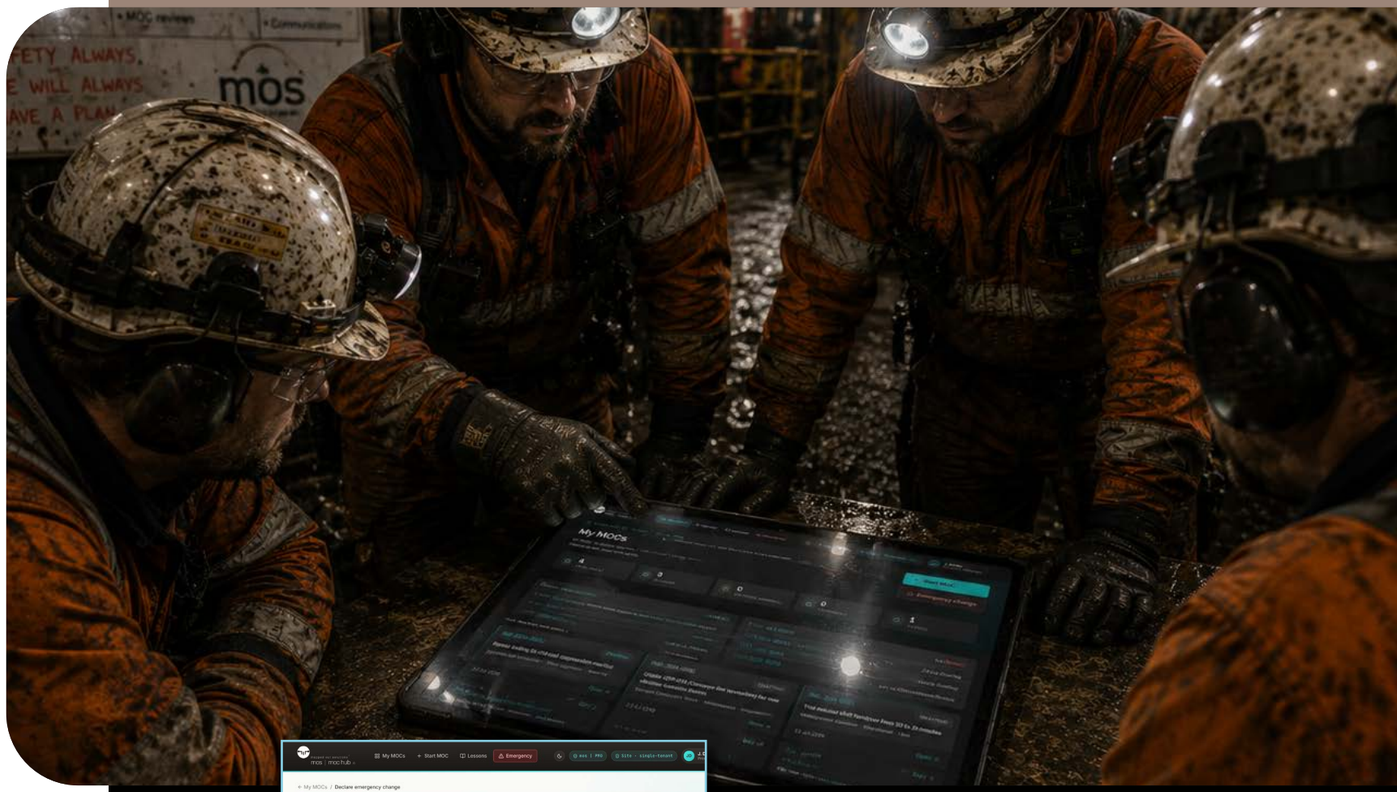
This software is about helping organisations manage change more safely, consistently and confidently, not just digitising forms.

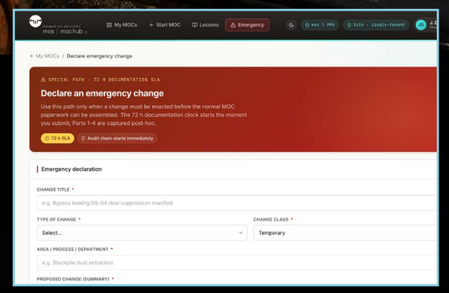
mapped out solutions

Why choose MOC®?

MOC® has been developed to help organisations improve visibility, strengthen accountability and support a more structured approach to operational change.

- **Built for operational environments**
  Designed specifically for industries where safety, governance and operational discipline matter.
- **Better visibility across the change process**
  Give teams clearer insight into progress, approvals and operational responsibilities.
- **Improve compliance & accountability**
  Support stronger governance through practical approval workflows and clearer operational records.
- **Easy to use**
  The platform is designed to present change management processes in a practical, easy-to-understand format.
- **Support when you need it**
  Mapped Out Solutions provides training and ongoing support to help your team confidently adopt and use the platform.





Emergency change still follows a recorded path

Planning made simple

With mos | MOC®, every stage of change is captured in one structured workflow, helping teams strengthen accountability, maintain a clear audit trail and move from initial change through approval, review and closure with greater control and confidence.
