mos | Project®

At Mapped Out Solutions, we understand that operational projects require clear planning, visibility and accountability to be delivered successfully. That is why we developed Project® as a software solution designed to help organisations manage projects in a more structured, connected and practical way.

What mos | Project® offers

Project® is built to help operations manage projects through one connected environment, improving visibility, coordination and confidence across every stage of delivery.

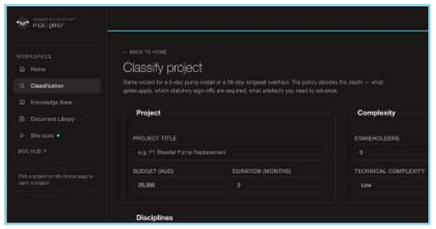
Here's how it supports your operation:

- **Consistent project management**
  Support projects through one practical lifecycle that helps teams manage planning, responsibilities and delivery with greater confidence.
- **Scalable for different project sizes**
  Apply the same structured approach across small, medium and large projects while adapting to operational requirements.
- **Improved visibility & accountability**
  Track progress, responsibilities and milestones through one connected view to help teams stay aligned.
- **Stronger governance & oversight**
  Support clearer approvals, reporting and project confidence through practical workflows designed for operational environments.

Key features for everyday use

- **Structured project lifecycle**
  Manage projects through a practical framework designed to support planning, delivery, review and closure.
- **Project classification**
  Support different project sizes and complexity levels with scalable workflows that adapt to operational needs.
- **Sign-off & governance visibility**
  Maintain clearer oversight of approvals and project accountability to support confidence and compliance.
- **Task & work breakdown visibility**
  Track activities, ownership and project progress in one connected environment.
- **Risk awareness & tracking**
  Support stronger outcomes through clearer visibility of project risks and operational priorities.
- **Lessons learned & continuous improvement**
  Capture project outcomes and insights to strengthen future delivery and organisational knowledge.

This software is about helping organisations manage projects more consistently and confidently, not just replacing spreadsheets.



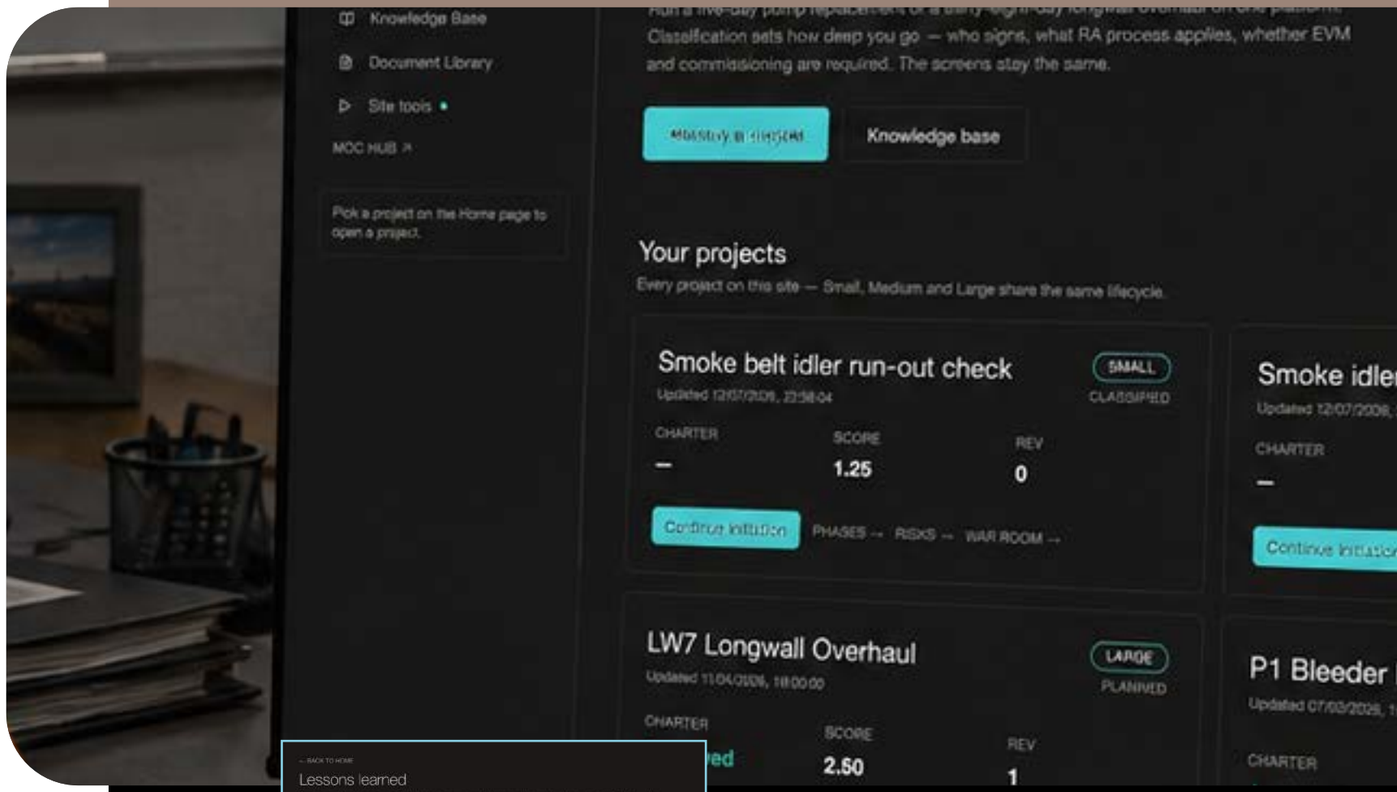
Classify the job first. Size and complexity set how deep the project goes

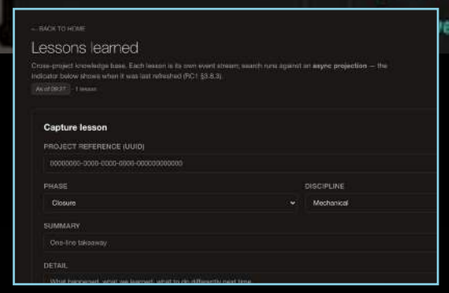
mapped out solutions®

Why choose Project®?

Project® has been developed to help organisations improve project visibility, strengthen accountability and support more consistent operational delivery.

- **Built for operational environments**
  Designed specifically for industries where governance, accountability and operational discipline matter.
- **Better visibility across delivery**
  Give project teams and leaders clearer insight into priorities, progress and project performance.
- **Improve coordination & accountability**
  Support stronger ownership, communication and follow-through across project teams.
- **Easy to use**
  The platform is designed to present project information in a practical, easy-to-understand format.
- **Support when you need it**
  Mapped Out Solutions provides training and ongoing support to help your team confidently adopt and use the platform.





Capture the lesson at closure so the next job starts smarter

Planning made simple

With mos | Project®, every project follows the same structured lifecycle, with the level of control scaled to the job. From classification and statutory sign-off to risk, progress and closure, teams gain the visibility and rigour needed to keep projects moving without unnecessary complexity.
